

Chief, Administrative Staff, ORR

9 June 1958

Deputy Chief, Economic Research

Amendment to Proposed Reallocation of Positions in ORR and Proposed Reorganization of Branches in the Analysis, Industrial and Services Divisions, ORR

REFERENCE: Memorandum of 25 April 58 to DD/S from AD/RR on the same subject

1. In the above-noted memorandum, we proposed to add a GS-11 position to the Construction Branch, Services Division. We now request that a GS-13 position be created instead of the GS-11. This change in grade is necessary in order to avoid unintentionally creating an inequitable situation.

2. With the new responsibilities given the Construction Branch in the proposed reorganization the Branch will be organized into 5 sections as follows: USSR Section, European Satellites Section, Far East Section, Construction Materials Section, and Civil Defense Section. The present table of organization for the Branch provides for two GS-14 positions which are informally assigned to the chiefs of the two larger sections - those for the USSR and the European Satellites. The T/O also provides for two GS-13 positions which are assigned to the senior analysts responsible for Construction Materials and Civil Defense. The T/O as now proposed, however, does not provide a GS-13 position for the senior analyst responsible for the Far East, who serves as project leader in his field and regularly directs the activities of a junior analyst.

3. In order to remedy this situation, it is requested that a GS-13 position be established to replace the GS-11 position originally proposed for the Construction Branch.
